

Access controls worksheet

	Note(s)	Issue(s)	Recommendation(s)
Authorization /authentication	Objective: List 1-2 pieces of information that can help identify the threat: All information is listed from the log: - Who caused this incident? The user "Legal\Administrator" - When did it occur? The incident occurred on 10/03/2023 at 8:29:57 AM, - What device was used? A computer "Up2-NoGud" with the IP address: 152.207.255.255.	Objective: Based on your notes, list 1-2 authorization issues: - What level of access did the user have? This incident shows that a user with the "Administrator" role had access to payroll functions, which typically involve sensitive information. In this case, the administrator may have had more access than was actually needed for their responsibilities. - Should their account be active? They should have either been	Objective: Make at least 1 recommendation that could prevent this kind of incident: Which technical, operational, or managerial controls could help? Role-Based Access Control (RBAC) could help by making sure users only have the permissions they actually need for their job. Limiting access to sensitive areas, like payroll, to specific employees would lower the chances of this kind of incident happening again.

		<i>deactivated or closely monitored, especially when it comes to payroll functions, to prevent any unauthorized access or misuse of sensitive information.</i>
