

Has this file hash been reported as malicious? Explain why or why not.

The file has been flagged as malicious by 56 different security vendors. The file hash is linked to the trojan Flagpro.

Vendors' Ratio: A large number of vendors marked the file as malicious, which is shown by the high count of detections with alerts.

Community Score: The community score is negative, which supports that the file is most likely harmful.

Security Vendors' Analysis: In the Detection tab, several vendors identified the file as malicious, with many labeling it as Qakbot malware.

Given the high number of detections, the negative community feedback, and multiple confirmations of malware activity, it's clear that this file is malicious.
