

Security organization worksheet

Part 1: Describe your security interests
• Raising security awareness • Protecting sensitive data • Security Data Analytics • AI and Machine Learning Security
Part 2: Identify three organizations and include their mission or objectives
• Organization 1: National Cybersecurity Alliance (NCA) • Organization 2: International Association of Privacy Professionals (IAPP) • Organization 3: Coalition for Secure AI (CoSAI)
Part 3: Write out which organization aligns with your interests and why
• Organization 1: National Cybersecurity Alliance is a non-profit organization dedicated to empowering digital citizens and businesses. Its objective is to promote cybersecurity education and collaborative awareness campaigns to keep users and their sensitive information secure online. • Organization 2: International Association of Privacy Professionals is the largest global information privacy organization. Its objective is to define, support, and improve the privacy profession through data-driven research, global policy neutrality, education, and trusted data governance frameworks. • Organization 3: Coalition for Secure AI is an open ecosystem of global industry and academic experts. Its objective is to share security expertise, conduct research, and build standardized open-source methodologies for secure AI development and deployment. • Best choice for my professional interests: The best choice for my professional interest is Coalition for Secure AI (CoSAI) because I enjoy using data to research problems, identify patterns, and develop models that can help predict outcomes. I am also interested in communicating these findings through clear visualizations so that complex data can be turned into meaningful and actionable insights.
